## Risk disclosures

**An investor should consider the investment objectives, risks, charges, and expenses of the Fund carefully before investing. To obtain a prospectus containing this and other information, please call (866) 773-4120 or download the file from [www.RREDIF.com](http://www.RREDIF.com). Read the prospectus carefully before you invest.**

The Fund is distributed by ALPS Distributors, Inc. (ALPS Distributors, Inc. 1290 Broadway, Suite 1100, Denver, CO 80203). Resource Real Estate, Inc. and ALPS Distributors, Inc. are not affiliated.

*Investing involves risk. Investment return and principal value of an investment will fluctuate, and an investor's shares, when redeemed, may be worth more or less than their original cost. Alternative investment funds, ETFs, interval funds, and closed-end funds are subject to management and other expenses, which will be indirectly paid by the Fund. Preferred securities are subject to credit risk and interest rate risk. Convertible securities are typically issued as bonds or preferred shares with the option to convert to equities. As a result, convertible securities are hybrids that have characteristics of both bonds and common stocks and are subject to risks associated with both debt securities and equity securities. Issuers of debt securities may not make scheduled interest and principal payments, resulting in losses to the Fund. Typically, a rise in interest rates causes a decline in the value of fixed income securities. The use of leverage, such as borrowing money to purchase securities, will cause the Fund to incur additional expenses and magnify the Fund's gains or losses.*

*There currently is no secondary market for the Fund's shares and the Fund expects that no secondary market will develop. Limited liquidity is provided to shareholders only through the Fund's quarterly repurchase offers, regardless of how the Fund performs. Investments in lesser-known, small and medium capitalization companies may be more vulnerable than larger, more established organizations. The Fund will not invest in real estate directly, but because the Fund will concentrate its investments in securities of REITs, its portfolio will be significantly impacted by the performance of the real estate market. There are risks associated with REITs. Risks include declines from deteriorating economic conditions, changes in the value of the underlying property, and defaults by borrowers. The sales of securities to fund repurchases could reduce the market price of those securities, which in turn would reduce the Fund's NAV.*

## Management Matters

## Definitions

**Dividend Coverage Ratio** is a coverage ratio that measures a company's ability to pay off its required preferred dividend payments.

**Private Real Estate Equity** consists of actively managed real estate equity investments in an unlisted format, typically through a fund or trust. This includes private equity real estate funds and investments in non-traded REITs.

**Real Estate Credit** is an investment in a real estate company through a loan obligation, which typically includes instruments such as commercial mortgage backed securities, preferred equity and bonds. This investment may benefit from a higher claim on the assets and earnings of a company than common equity, does not have voting rights, and pays a fixed dividend with a yield usually above that of common equity.

**Global Traded REIT Equity** is a common stock investment in a publicly traded REIT that owns and operates income-producing real estate. REIT Equity is traded on stock exchanges and has voting rights.

**Fair Value Process** – While most securities that are held in our portfolio are publicly traded and have an established daily price, a portion of our portfolio is illiquid and does not trade on a public market. While these securities are priced on a monthly, quarterly, or annual basis by their respective companies, these securities have to be fair valued to establish a daily price in between these periods in order to determine the fund's NAV. The fair value process is an internal methodology to determine the "fair value" of a security, which is the price that the fund might reasonably expect to receive upon a current sale.

**Discounted Cash Flow** is a valuation method used to estimate the attractiveness of an investment opportunity. DCF analysis uses future free cash flow projections and discounts them to arrive at a present value estimate, which is used to evaluate the potential for investment.

# Who is Managing Your Money?

As the investor, you may not always know how your money is being managed or who is managing it. Do you know if your investments are managed in-house by the funds or if those companies outsource their portfolio management to sub-advisors?

## The Resource difference

The Resource Real Estate Diversified Income Fund (the "Fund") is actively managed by an in-house team and does not utilize third-party sub-advisors. As an investor, this means that you can benefit from a consistent, experienced team that is focused on the Fund's objectives and performance.

### The Fund's In-house Management

Alignment of Interests	Transparency
<p><b>Consistent, focused management</b></p> <ul style="list-style-type: none"> <li>Portfolio management is accountable for performance</li> <li>Fewer layers of fees</li> <li>Conflicts of interest are avoided</li> </ul>	<p><b>Direct access to financial data</b></p> <p>Private equity firms do not always provide transparency to their holdings. The Fund:</p> <ul style="list-style-type: none"> <li>Publishes its complete list of holdings</li> <li>Has a higher percentage of investments that have clear value priced by the market</li> </ul>

## The Fund's investment process

Resource implements a rigorous investment selection process for the Fund that includes multiple screens to achieve one, professionally managed portfolio.

Resource and its affiliates have a 25-year track record of managing real estate investments for both institutional and retail investors.

## Resource portfolio management

#### Portfolio

Private Real Estate Equity	Real Estate Credit	Global Traded REIT Equity
10–15	25–30	25–35

\* Target annualized distribution is measured at the Fund level and is not equal to actual returns for an investor. As portfolio and market conditions change, future distributions will vary and target annualized distribution may not be obtained in the future. A portion of our distribution has been comprised of a return of capital because certain Fund investments have included preferred and common equity investments, which may include a return of capital. Distributions are not guaranteed.
