

Seeking Market-beating Returns with Lower Volatility

When it comes to investing, returns matter. The Resource Real Estate Diversified Income Fund (the “Fund”) is an actively managed institutional real estate fund that seeks to deliver market-beating returns with lower volatility. We believe our track record speaks for itself.

The Fund seeks to outperform the market...

Value of \$10,000 After One Year

A \$10,000 investment
in the Fund on July 1, 2016
would have been worth
\$10,923 after one year,
gross of fees

Performance shown does not include any applicable sales charges and fees. The chart represents a hypothetical investment at the beginning of the time period shown. You cannot invest directly in an index. Past performance does not guarantee future results.

...with lower volatility:

4.73% Resource Real Estate Diversified Income Fund

11.09% FTSE NAREIT All Equity REITs Total Return Index

13.91% MSCI US REIT Gross Return Index

It adds up to alpha

Alpha is a measure of excess returns—it is how much an actively-managed fund outperforms a benchmark. According to MorningStar, compared to the FTSE NAREIT All Equity REITs Total Return Index benchmark, the Fund delivered alpha of 8.82 percent for the year ended June 30, 2017.

Volatility is a statistical measure of the dispersion of returns for a given security or market index. Volatility was measured by using the annualized standard deviation. Commonly, the higher the volatility, the riskier the security.

Definitions

The **FTSE NAREIT All Equity REITs Total Return Index** is a free-float adjusted, market capitalization-weighted index of U.S. Equity REITs. Constituents of the Index include all tax-qualified REITs with more than 50 percent of total assets in qualifying real estate assets other than mortgages secured by real property.

Alpha is a measure of the degree to which an investment outperforms its benchmark, typically an index.

The **MSCI US REIT Gross Return Index** is a free float-adjusted market capitalization index that is comprised of equity REITs. With 154 constituents, it represents about 99 percent of the US REIT universe and securities are classified in the Equity REITs Industry according to the Global Industry Classification Standard (GICS®).

Risk disclosures

There is no guarantee that the Fund will achieve its objectives, generate profits, or avoid losses. Diversification does not ensure profit or prevent losses.

An investor should consider the investment objectives, risks, charges, and expenses of the Fund carefully before investing. To obtain a prospectus containing this and other information, please call (866) 773-4120 or download the file from www.RREDIF.com. Read the prospectus carefully before you invest.

The Fund is distributed by ALPS Distributors, Inc. (ALPS Distributors, Inc. 1290 Broadway, Suite 1100, Denver, CO 80203). Resource Real Estate, Inc. and ALPS Distributors, Inc. are not affiliated.

Investing involves risk. Investment return and principal value of an investment will fluctuate, and an investor's shares, when redeemed, may be worth more or less than their original cost. Alternative investment funds, ETFs, interval funds, and closed-end funds are subject to management and other expenses, which will be indirectly paid by the Fund. Preferred securities are subject to credit risk and interest rate risk. Convertible securities are typically issued as bonds or preferred shares with the option to convert to equities. As a result, convertible securities are hybrids that have characteristics of both bonds and common stocks and are subject to risks associated with both debt securities and equity securities. Issuers of debt securities may not make scheduled interest and principal payments, resulting in losses to the Fund. Typically, a rise in interest rates causes a decline in the value of fixed income securities. The use of leverage, such as borrowing money to purchase securities, will cause the Fund to incur additional expenses and magnify the Fund's gains or losses.

There currently is no secondary market for the Fund's shares and the Fund expects that no secondary market will develop. Limited liquidity is provided to shareholders only through the Fund's quarterly repurchase offers, regardless of how the Fund performs. Investments in lesser-known, small and medium capitalization companies may be more vulnerable than larger, more established organizations. The Fund will not invest in real estate directly, but because the Fund will concentrate its investments in securities of REITs, its portfolio will be significantly impacted by the performance of the real estate market. There are risks associated with REITs. Risks include declines from deteriorating economic conditions, changes in the value of the underlying property, and defaults by borrowers. The sales of securities to fund repurchases could reduce the market price of those securities, which in turn would reduce the Fund's NAV.
